What does the Marshalls Energy Company do?

"The Marshalls Energy Company is a semi-autonomous utility company responsible for the generation, distribution and sale of electricity on a number of islands and atolls within the Republic of the Marshall Islands."

How does the EU help the Marshall Islands?

The EU is helping to improve energy efficiency, including replacement of transformers, and is supporting an energy sector management bill. The Marshall Islands are served by two government-owned electric utility companies: Marshall Island Energy Company (MEC) and Kwajalein Atoll Joint Utilities Resources (KAJUR).

What is the power supply for Ebeye Island?

The power supply for Ebeye Island and surrounding islets consists of the generation plant containing three diesel generators (1.2 MW each) and associated power distribution network. The maximum peak demand of the island is 3 MW.

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel generation with renewable energy in the form of wind and solar. Most of all it depends on our people. Take a look at where we are headed.
