

Microgrid company British Indian Ocean Territory

What is a microgrid in India?

In India, a microgrid was first pioneered in the 1990s by the West Bengal Renewable Energy Development Agency (WBREDA) when it installed a 25KWp solar PV system in the Sundarban delta region. Subsequently, the Chhattisgarh Renewable Energy Development Agency (CREDA) initiated a solar plant in the Bilaspur district.

What are microgrid solutions?

Our microgrid solutions ensure power supply resilience, power quality, sustainability and cost-effectiveness in a broad range of applications.

What is Fimer's expertise in microgrid solutions?

Microgrid solutions FIMER has unmatched expertise in designing and building off-grid and grid-connected microgrids.

Distributed architecture in the form of microgrids offers communities much more resiliency as there's not one single point of attack. Local ecosystems: Managing multiple energy sources in a microgrid, with different generation and availability characteristics, requires management of new supply chains and partners. Residents and businesses ...
