

Montserrat solar power packages for homes

Why do we need solar panels in Montserrat?

The use of Solar Panels meets one of the Governments priority needs which is to improve energy security by slowly transitioning to renewable energy. The incorporation of Solar into the Grid on Montserrat, resulted in a 13% renewable energy input on the grid, which is 3% above the European Union's key performance indicator (KPI) of 10% .

Who has installed a 250kW solar PV project in Montserrat?

The awarding of a contract to Salt Energy Company for the installation of a 250KW Solar PV Project in 2018 as the first phase 250KW Solar photovoltaic (PV) Project. The solar PV system was successfully installed and commissioned by the Salt Energy Company and handed over to the Government of Montserrat in March of 2019.

What is Montserrat's energy policy?

The first Energy Policy was approved in 2008 by the Government of Montserrat. The policy was then revised and updated in 2016 to include Government incentives and to update the policy with appropriate targets. The new Energy Policy (The Power to Change) that is currently being implemented runs from 2016 to 2030. Progress made so far includes: -

What is Montserrat Utilities Limited?

Montserrat Utilities Limited (MUL) is the entity that was formed through the merger of the existing electricity (MONLEC) and water (MWA) utility companies. After the merger's completion, MUL acquired all of the assets, liabilities, duties, and privileges of the predecessor organisations and began operating under new legislation (The Utility Act).

How much does Montserrat real estate cost?

All Montserrat real estate transactions are conducted in U.S. dollars, and you will get a title for your property or a Freehold Land Certificate once the deal is closed. Most houses sold are completely decorated or furnished, and upon purchase you can move in almost immediately. \$365,000, which is a steal for Caribbean real estate.

Why should Montserrat buy a new electric vehicle?

The purchase of the vehicle supports the Government's aim to promote the development of electric, hybrid electric and advanced vehicle technologies for Montserrat. A pilot project was commissioned to review the performance of the technology under local conditions and get feedback of driver's acceptability.

The solar photovoltaic (PV) project is the first phase of two planned renewable energy projects to reduce the dependence on fossil fuel for power generation on Montserrat. The rooftop solar project will provide 10% of
