

What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

How can Mozambique achieve its electrification goal?

The use of proven power generation technologies coupled with a well-structured and realistic data-driven plan will enable Mozambique to reach its electrification goal. To identify the optimal power system for Mozambique, a few key questions must be considered. Should Mozambique cap new renewable energy capacity to 100 MW/year?

Does Mozambique have a major energy transition strategy?

Across Mozambique there are significant hydro, solar and wind growth plans, particularly in the north of the country. The strengthening of the Northern grid will enable greater penetration of renewables in Mozambique over time. The country's President, Felipe Nyusi recently announced a major energy transition strategy at the COP28 summit in Dubai.

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) - South Africa being the largest importer. The government views energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.

What is the optimal power system expansion plan for Mozambique?

The optimal power system expansion plan if wind and solar capacity are allowed to triple to reach almost 3 GW by 2032. Currently, the power system of Mozambique is separated into two transmission networks isolated from one another: the Central-Northern and Southern systems. Over 50% of the annual power demand is seen in the Southern system.

How much power does Mozambique have?

The country's biggest power plant, Cahora Bassa hydro plant, has an installed capacity of 2,075 MW. Currently, over 75% of the electricity generated from the hydropower plant is exported to South Africa. The remaining capacity, around 1,300 MW, is utilised to meet local electricity demand in Mozambique.

FMT-group possesses a wide range of moto-generators which operate with a high performance bearing principle, conversion of mechanical energy into electrical energy. Moto-generator is a device which ensures a continuous power at any time and moment. He is Composed of two very important parts such as engine and Alternator.
