

Myanmar hdr power systems

What is the Myanmar power system efficiency and Resilience Project?

The Myanmar Power System Efficiency and Resilience Project will finance the upgrade to the Ywama gas-fired power plant, improving the availability and reliability of electricity services to consumers in the Yangon region.

How can Myanmar improve its power system?

Rebuilding Myanmar's power system will require establishing trust to develop the power sector. Developing solar PV can add incremental generating capacity in a relatively fast manner.

What is happening in Myanmar's power sector?

Myanmar's power sector has been severely affected by the ongoing political turmoil. The power sector has been spiralling downwards since 2021 with prolonged electricity blackouts throughout the country. Electricity generation has been declining, resulting in a widening power supply-demand gap.

Will Myanmar achieve universal electricity access by 2030?

The Board also approved \$110 million in additional financing for the Essential Health Services Access Project, implemented nationwide since 2015. Myanmar needs to double its current installed power generation capacity over the next five to seven years to achieve universal electricity access by 2030.

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Can Myanmar revive the development of hydropower and LNG-to-power?

In the longer term, Myanmar can revive the development of hydropower and LNG-to-power, which were planned in the past or were under construction but did not materialize. Political and macroeconomic stability is important to improve investment climate for these options on the ground.

Myanmar needs to double its current installed power generation capacity over the next five to seven years to achieve universal electricity access by 2030. The Myanmar Power System ...
