

Myanmar power back up

How can Myanmar improve its power system?

Rebuilding Myanmar's power system will require establishing trust to develop the power sector. Developing solar PV can add incremental generating capacity in a relatively fast manner.

What is happening in Myanmar's power sector?

Myanmar's power sector has been severely affected by the ongoing political turmoil. The power sector has been spiralling downwards since 2021 with prolonged electricity blackouts throughout the country. Electricity generation has been declining, resulting in a widening power supply-demand gap.

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Is Myanmar's power sector affected by political and macroeconomic instability?

Myanmar's power sector has been severely affected by political and macroeconomic instability since the February 2021 military takeover. Following the significant uncertainty and volatility that characterized much of 2022, economic conditions appear to have stabilized in the first half of 2023.

Can power trade and imports help ease power shortages in Myanmar?

While power trade and imports could help ease the electricity supply shortages, it remains challenging under the current political circumstance in Myanmar. Myanmar's power sector continues to record losses due to a combination of several factors, including currency depreciation, increasing grid maintenance cost, and revenue decline.

What happened to power plants in Myanmar?

For these cases, transmission lines or substations connecting those power plants were damaged, gas pipelines to those plants were destroyed, or power plants themselves were temporarily occupied by the resistance force. Figure 13. Attacks on energy infrastructure (August 2021 - February 2023) Source: Myanmar Institute for Peace and Security.

After many classes were cancelled, she has been forced to use a power generator as a back-up. ...
