

# Namibia effective power solutions

Does Namibia have a solar power plant?

The government, the ECB, and NamPower have all expressed interest in grid-connected solar and wind renewable solutions, and in May 2015, Namibia inaugurated its first-ever solar power plant - a 4.5 MW plant - which represents one percent of the country's current production of energy.

Does Namibia accept unsolicited power generation projects?

The Electricity Control Board (ECB), Namibia's electricity regulator, accepts unsolicited power generation projects through its IPP framework. The Minister of Mines and Energy has final authority to approve/refuse IPP licenses, but the ECB makes recommendations on license applications, which the Minister has historically followed.

Does Namibia have a centralized power system?

Namibia is evolving from a centralized model dominated by one large utility, NamPower, to a hybrid decentralized model with multiple actors generating and supplying electricity. This represents a significant shift in the generating mix.

Can Namibia generate energy from renewable sources?

With ample sunshine and wind resources (on the coast), Namibia has the capability to generate significant energy from renewable sources.

How did NamPower make Namibia less reliant on South Africa?

In 2021, NamPower also completed the N\$3.2 billion TransCaprivi Interconnector which connects central Namibia directly with the power grids of Zambia and Zimbabwe, thereby making Namibia less reliant on South Africa's transmission network.

How much power does Namibia need?

Peak demand is over 600 MW. Namibia has long relied on imported power from South Africa (Eskom) and other neighboring countries, but South Africa's own economy has put strains on its domestic electricity generation capability and thus its ability to export. Namibia has a power purchase agreement with Eskom which expires in 2025.

Unique Power Solutions is located in Windhoek. Unique Power Solutions is working in Scientific and technical services activities. You can contact the company at 081 610 8656. You can find more information about Unique Power Solutions at [consult977.wixsite](http://consult977.wixsite) .
