

Where is renewable ammonia produced in Namibia?

Namibia has some of the best combined solar and wind resources globally, allowing for high-capacity, low-cost renewable ammonia production. Renewable ammonia projects in Namibia are being developed in two regions, in the Tsau Khaeb national park toward the south (close to L&#252;deritz and Angra Point), and near Walvis Bay on the central Namibian coast.

Why is Namibia a good place to invest?

Namibia is also a stable democracy. This is highly relevant for investors, because the geopolitical situation determines the bankability of capital intensive, mega-scale projects such as renewable ammonia plants. First announced in 2021, Hyphen Hydrogen Energy is developing its renewable ammonia project in the L&#252;deritz Area.

What does NamPower do in the Namibian electricity market?

In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer. For some years now, the Namibian government has been attempting to liberalise the market with a view to creating

What is happening in Namibia?

Conditions have improved in Namibia for the production, export and local use of green hydrogen and related fuels. Environmental and social risks have been taken up in the political debate. Dialogue with civil society is being implemented.

How many MW of Hydropower is being used in Namibia?

Of these, 347 MW are already being used from Ruacana hydro-electric power station. However, hydropower potential in Namibia is mostly theoretical, as limited water resources and regular drought make the continuous operation of hydropower plants difficult or near impossible.

Does Namibia have a vision of shared prosperity?

As Namibia embarks on this new frontier, it is imperative that its vision of shared prosperity on the national, regional and global levels is realized. Meaning that we do not neglect those without access to political and economic power today nor exclude those who currently rely on carbon fuels.
