

# Namibia power walls

How much power does Namibia need?

Peak demand is over 600 MW. Namibia has long relied on imported power from South Africa (Eskom) and other neighboring countries, but South Africa's own economy has put strains on its domestic electricity generation capability and thus its ability to export. Namibia has a power purchase agreement with Eskom which expires in 2025.

Does Namibia have a solar power plant?

The government, the ECB, and NamPower have all expressed interest in grid-connected solar and wind renewable solutions, and in May 2015, Namibia inaugurated its first-ever solar power plant - a 4.5 MW plant - which represents one percent of the country's current production of energy.

How did NamPower make Namibia less reliant on South Africa?

In 2021, NamPower also completed the N\$3.2 billion TransCaprivi Interconnector which connects central Namibia directly with the power grids of Zambia and Zimbabwe, thereby making Namibia less reliant on South Africa's transmission network.

How many independent power projects does Namibia have?

Namibia moved from having no operating IPPs in 2015 to having 20 at the end of 2018 - making it the sub-Saharan African country with the fourth-most independent power projects, surpassed only by South Africa, Uganda and Kenya (Eberhard et al., 2019), and fundamentally changing the character of the Namibian power market.

Why did Namibia only auction solar PV capacity?

Technology choice: specific vs. neutral Namibia chose to only auction solar PV capacity based on the technology's relative simplicity, the country's excellent solar resources and the utility's desire to understand the technology better.

Does Namibia have a centralized power system?

Namibia is evolving from a centralized model dominated by one large utility, NamPower, to a hybrid decentralized model with multiple actors generating and supplying electricity. This represents a significant shift in the generating mix.

Q& A with Namibia Power Corporation. Africa-Press - Namibia.
