

The new liquid contains up to 6.9% hydrogen by weight, surpassing the hydrogen storage goals set by the U.S. Department of Energy for 2025. This discovery marks the beginning of a new ...

KATHMANDU, July 10: The state-owned Nepal Oil Corporation (NOC), which has been importing and selling petroleum products from India, has unveiled plans to produce and use hydrogen ...

So-called liquid organic hydrogen carriers (LOHCs) offer a solution to the storage and transport problem. But inserting and extracting hydrogen into LOHCs requires catalysts that are often ...

Hydrogen storage used to be one of those niche industrial topics only a few insiders really paid attention to. But not anymore. Today, it's becoming a powerhouse in the global clean energy ...

Green Hydrogen, Energy Storage & Solar: The Future of Energy Is Collaborative and Digital We need to discuss the importance of collaboration, innovation, and digitalization in driving a ...

The inclusion of three projects from Nepal among 14 total qualifiers highlights the country's dedication to integrating sustainability into its energy infrastructure and aligning with global ...

METASPACEX, a leading energy sector company, has announced a strategic partnership with Chongqing Bihe New Energy Technology Co., Ltd. (Chongqing Bihe) to enter the hydrogen ...

Three energy storage methods are as following. Method 1: battery as the only energy storage technology. Method 2: hydrogen fuel cell as the only energy storage technology. Method 3:...

Selecting the right hydrogen storage method involves a careful consideration of various factors, including application requirements, infrastructure availability, cost, and safety. Compressed ...

Nepal's Green Hydrogen Policy offers fiscal and infrastructural incentives to attract early movers. It includes provisions for land access, transmission line construction, carbon trading ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

The proposed investment--worth around NPR 6.87 billion (USD 50 million)--will explore large-scale hydrogen production using Nepal's surplus hydroelectricity via electrolysis. The project ...

Nepal hydrogen energy storage
