Who is Kallista energy?

Kallista Energy is an independent renewable energy company. Our activities include wind, solar, electric mobility and battery energy storage. Our approach is focused on the long term, with the objective of generating electricity in the most cost-effective and environmentally sustainable manner. We operate in France, Germany and the Netherlands.

Where does Kallista operate?

We operate in France, Germany and the Netherlands. Kallista Energy group owns and operates 38 wind and solar farms. Additionally, several very high-power recharging stations are currently under development. We are actively engaged in battery electricity storage projects. Contribute to the energy transition !

What makes Kallista Energy Group different?

Kallista Energy Group owns and operates all its energy infrastructure. Our projects are designed with the support of independent experts and in consultation with local stakeholders. What makes us different ? According to the IPCC, renewable energy sources are among the most effective solutions for mitigating the impacts of climate change.

Who are Kallista energy's institutional shareholders?

Kallista Energy's institutional shareholders, APG and Ardian, provide the company with a long-term outlook. Furthermore, since 2020, the vast majority of Kallista Energy employees have become shareholders, ensuring full alignment with the company's values and vision.

How much energy does North Korea use?

North Korea is a net energy exporter. Primary energy use in North Korea was 224 TWh and 9 TWh per million people in 2009. The country's primary sources of power are hydro and coal after Kim Jong Il implemented plans that saw the construction of large hydroelectric power stations across the country.

Does North Korea have energy security challenges?

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting. This report, "North Korea's Energy Sector," is a compilation of articles published on 38 North in 2023 that surveyed North Korea's energy production facilities and infrastructure.

Kallista Energy a l'un des tout premiers acteurs du secteur du renouvellement complet d'un parc éolien en France (développement et installation de nouvelles éoliennes) dès 2017. Le groupe avait pris l'initiative d'arrêter la construction des massifs de fondation des éoliennes avant que cela ne devienne une ...
