Most can produce more power on propane versus natural gas, but a few have the same rating. As the name indicates, they are fully automatic and turn on whenever the power shuts off, restoring power within a few seconds. When the utility restores power, the power source transfers back to the utility and the generator shuts down.

Kohler Power Home Generators. Kohler Generators have delivered energy solutions around the world since 1920. The revolutionary Kohler Power & Light generator system for rural homes and farms brought power to the countryside before electricity was available. The automatic generator turned itself on and off as power was needed.
