

Why is energy in Norway so important?

With North Sea oil production having peaked, disagreements over exploration for oil in the Barents Sea, the prospect of exploration in the Arctic, as well as growing international concern over global warming, energy in Norway is currently receiving close attention.

What is the role of the Ministry of energy in Norway?

Petroleum activities have contributed significantly to economic growth in Norway, and to the financing of the Norwegian welfare state. The principal responsibility of the Ministry of Energy is to facilitate a coordinated and integrated energy policy.

What type of energy does Norway produce?

Norway is a large energy producer, and one of the world's largest exporters of oil. Most of the electricity in the country is produced by hydroelectricity.

Why should Norway invest in hydropower?

An abundance of affordable hydropower has enabled the development of energy-intensive industries and a high level of electrification of homes and businesses with limited GHG emissions. At the same time, as a major oil and gas producer and exporter, Norway will need to support an evolution of its energy sector amid a global energy transition.

Why is Norway a major energy producer and exporter?

At the same time, as a major oil and gas producer and exporter, Norway will need to support an evolution of its energy sector amid a global energy transition. Thanks to its ample reserves of oil and natural gas, Norway is a net energy exporter: in 2020, 87% of its energy production was exported.

How many hydroelectric power plants are there in Norway?

The Randsfoss power station (98MW) on the Glomma River. Norway's 1,166 hydroelectric generating stations provide between 98% and 99% of the country's power supply. Electricity generation in Norway is almost entirely from hydroelectric power plants.

Last Friday "Vestland Mira", owned by the shipping company Vestland Offshore, was named in Balestrand in the Norwegian county of Sogn and Fjordane. Only seven minutes after the naming ceremony, the Havyard-designed vessel "Vestland Mira", went straight into work on a contract in The North Sea. "We have started on a contract with SGS, a [...]"

West Mira is a sixth-generation, ultra-deepwater semi-submersible designed by Moss Maritime and will be the world's first modern drilling rig to operate a low-emission hybrid (diesel-electric) power plant using ...

Norway mira energy

The energy storage solution that will be supplied to West Mira is based on field-proven technology, which has been installed in more than 60 marine vessels worldwide, including the world's first electric car ferry, MF Ampere, in Norway.

Most recently, Mira was the head of residential power for Shell. Mira won the 2019 C3E Award from the US Department of Energy, recognizing her contributions to the field of clean energy. She holds a BS from Oberlin College and an MBA from the University of California at Berkeley. She is an amateur surfer and skateboarder.
