How can Botswana improve its energy supply?

This includes increasing the supply and reliability of Botswana's energy supply, reducing the cost of domestic electricity, reducing and ideally removing the need for Botswana to import external energy and creating a revenue stream through the export of cleaner electricity and sale of gas. ..

What is the energy situation like in Botswana?

Botswana's energy sector is a growing industry with significant potential. Almost all of Botswana's electricity is generated from coal. There are no identified petroleum reserves, and all petroleum products are imported and refined, primarily from South Africa. Botswana also has an extensive supply of woody biomass, ranging from 3 to 10 tons per hectare.

Where can I find information about energy access in Botswana?

Find relevant information for Botswana on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the TrackingSDG7 Botswana Page. The page covers Sustainable Development Goal indicators 7.1 energy access, 7.2 on renewable energy and 7.3 on energy efficiency.

Is Botswana a good place to work?

Botswana is a fantastic place to work with a well-educated workforce and extremely friendly people. We are eager to provide an energy pathway that utilises Botswana's natural resources of gas and sunlight to empower the country.
