

Beacon Offshore Energy LLC said it began oil and natural gas production at its Shenandoah field off the coast of Louisiana on Friday, nearly a month after it was originally expected to commence. Beacon, which in May said it expects first oil ...

It considers the operational constraints of the island's energy system, the offshore transportation network, the hydrogen storage infrastructure, and the electricity-hydrogen-transportation ...

The project aims to utilize state-of-the-art technology to capture CO₂ emissions from industrial facilities and transport them to offshore storage sites. This approach is expected to contribute significantly to reducing ...

SLB will deploy its Sequestri(TM) carbon storage solutions portfolio - which includes technologies specifically engineered and qualified for the development of carbon storage sites - to construct six carbon storage wells. The project scope ...

Additionally, the remote offshore location limited chemical storage capacity, requiring a solution that would be effective at minimal dosage rates. Innovative Chemistry Delivers Exceptional ...

SLB will deploy its Sequestri(TM) carbon storage solutions portfolio--which includes technologies specifically engineered and qualified for the development of carbon storage sites--to construct six carbon storage wells. The project scope ...

The global turret mooring systems market is experiencing robust growth, driven by the increasing demand for floating production storage and offloading (FPSO) units and floating liquefied ...

Expected to start up in 2028, the power station will capture up to 2 million tpy of CO₂ for permanent storage offshore in the North Sea, representing a major step forward in the UK's ...

The Floating Storage and Offloading Unit (FSO) market is experiencing robust growth, driven by increasing global demand for oil and gas, particularly in offshore and deepwater regions. The ...

Texas-headquartered energy technology company SLB has secured a contract to deliver carbon storage solutions for the UK's first offshore carbon capture and storage (CCS) project, developed by a joint venture of BP, Equinor and ...

Carbon capture and storage (CCS) is no longer just a future concept but is becoming a practical solution helping companies to plan cleaner energy projects and meet climate and sustainability ...

Offshore gas storage solutions
