

A massive component for the "next generation" of offshore wind turbines has been forged in China. Iraeta Forgings, a producer of advanced power equipment, announced last week that it ...

The final electrical substation for Dogger Bank C has been floated out to sea for installation, marking a major milestone in ABB's electrical infrastructure delivery for the world's largest ...

To further reduce the investment, a DC collection topology based on the series-connected diode rectifiers (DR) is proposed, where no offshore platform is needed. However, units of series ...

This growth is fueled by several key factors: the rising installation of offshore wind farms requiring sophisticated monitoring and control systems; the increasing adoption of digitalization and IoT ...

Submersible pumps in offshore wind farms are primarily used for cooling systems and ballast water management. Their installation involves seabed disturbance, which can temporarily ...

South Korean subsea cable manufacturer LS Cable & System has completed the construction of what it says is the largest high-voltage direct current (HVDC) cable production facility in Asia.

This paper investigates a flying base station (FBS) approach for wide-area monitoring and control in the UK Hornsea offshore wind farm project. By leveraging mobile, flexible FBS platforms in ...

An international offshore wind power training center has completed its overall design and is currently under construction in Shantou, Wen said. "The center fills the gap in offshore wind power training in Guangdong and, once ...

PNE is one of the leading renewable energy project developers and has implemented wind farms and photovoltaic systems with more than > 8 GW. This means that we can look back on extensive experience in both national ...

Intelligent planning of onshore/ offshore wind farms, including optimal layout design and repowering. Optimal cabling of offshore wind power plants. Fatigue and life cycle analysis ...

Can effective financial management transform your offshore wind project costs into a competitive edge? Explore the mix of operating, environmental compliance, and marine logistics expenses through this ...

After months of preparation, a fleet of 11 specialised vessels has mobilised to begin installing the foundations for Poland's first offshore wind farm in the Baltic Sea. This stage has already seen the successful installation

Offshore wind farm system management

of the ...

Vestas has reaffirmed its position as preferred supplier to Hanwha Ocean for the 390 MW Shinan Ui offshore
wind project in South Jeolla Province, South Korea. The original agreement was ...

The global drive toward renewable energy is accelerating, and offshore wind farms are at the forefront of this
transition. Yet, managing complex subsea fiber networks linking turbines and ...
