

What are the solar PV module certification requirements in Brazil?

In this article we have a closer look at the solar PV module certification requirements in Brazil, which are commonly known and summarized as INMETRO. If you're a PV manufacturer looking to gain access to the Brazilian solar energy market you'll need INMETRO certification. Are you looking to obtain INMETRO certification?

Do solar-thermal equipment need to be registered in Brazil?

This means that, after the Conformity Evaluation, the solar-thermal equipment can have its LI duly registered with Siscomex followed by the approval to be imported and commercialised in Brazil. Whilst the photovoltaic equipment still needs to be registered by Inmetro and to follow the procedures listed below.

Is Brazil ready for solar energy?

Brazil has a great potential for solar energy generation, but this is still a developing market. In 2012, the Brazilian Electric Energy Agency (ANEEL) published a new resolution (482/2012) to aid the connection of renewable energy systems to the distribution grid.

Can international solar companies participate in the Brazilian PV market?

However, even though the organization of INMETRO certification has been simplified, there are still more hurdles for international solar companies that want to participate in the Brazilian PV market. PV modules can only be imported by solar companies that are legally registered and operating in Brazil.

Does Brazil have solar panels?

Brazil is more advanced than most countries around the globe when it comes to clean energy, but the solar power presence is yet to be expanded in the energy matrix. This article outlines the certification process of solar panels to Brazil.

Can a foreign manufacturer import solar panels in Brazil?

Foreign manufacturers for photovoltaic systems see Brazil as a potential market, but in order to import and commercialise solar panels in Brazil, it is necessary for the products to be approved by Inmetro, and that they follow certain local standards.

Sepeco1 Construções do Brasil, a subsidiary of the Powerchina group, has reached an agreement with the state government of Mato Grosso, in Brazil, to build large solar power plants over the next few years, the first of which will require an investment of US\$307 million, according to a recent report in the China-Lusophone Brief (CLBrief).
