What is the maximum, recommended delta that the Overkill 120A BMS balancer can balance? For instance, my 4S, 272 Ahr battery has been setting at a low SOC (~25%) for some time. I've started charging at a low rate (5 Amps). The Overkill App is set to start balancing at 3400 mV and with a Delta of 15 mV. My cells are getting near the 3400.

If that situation exists, I doubt the JBD BMS sold by Overkill Solar will have enough balance current to correct the issue re-doing the top balance or bleeding off that high cell with a resistor might be a better option. Yes, the BMS has a built-in balancing function. HOWEVER no, it is not capable of doing an initial balance on new cells.. The balancer works by connecting a tiny bleed resistor to the cells with the highest voltage, and the excess energy in those cells turns into waste heat. This is a slow process. The intention is that the BMS can maintain the balance on the cells as they slowly ...
