

Stakeholders, including EV users, governmental authorities, charging station operators, charging station manufacturers and suppliers, e-mobility service providers, electricity distribution service ...

China is actively beefing up innovation concerning charging technology and business models -- with examples including fast charging, high-power charging, intelligent charging, wireless charging and mobile charging. ...

As the electric vehicle (EV) infrastructure expands, the importance of cybersecurity in protecting EV charging networks becomes paramount. This report delves into the key cybersecurity ...

The Government has announced a £63m investment package to break down barriers to electric vehicle ownership and boost charging infrastructure across the UK. The major EV investment ...

The global market for charging infrastructure for electric vehicles (EVs) and fleets is experiencing robust growth, projected to reach \$1920.5 million in 2025 and expand significantly over the ...

His Excellency Suhail bin Mohammed Al Mazrouei, Minister of Energy and Infrastructure, today outlined the details of the National Electric Vehicles Policy, recently approved by the UAE Cabinet. The policy serves as ...

The global electric vehicle (EV) revolution is accelerating, with adoption rates surging from 2% of car sales in 2018 to 18% in 2023. By 2030, electric cars could dominate 65% of global sales, ...

U.S. states have built just 384 electric vehicle (EV) charging ports at 68 locations across 16 states as of April 2025 under a \$7.5 billion federal infrastructure program launched in 2021, the ...

The report showed that, as of October 2024, charging infrastructure in China had exceeded 11.88 million units -- an increase of 49.4 percent year-on-year. Public charging infrastructure totaled 3.39 million units, up 34.3 percent, ...

This study explored electric vehicle (EV) charging networks by assessing environmental impacts through GHG and petroleum savings, developing dynamic pricing strategies, and forecasting infrastructure needs. A substantial dataset ...

This report provides a detailed data-centric analysis of the global electric vehicle and charging infrastructure industry, covering market opportunities and analysis across a range of electric ...

In this research, rapidly growing and densely populated urban region of Coimbatore north, planning electric vehicle (EV) charging infrastructure presents unique challenges, including ...

Less than 400 public EV charging ports have been installed despite the Biden administration pouring billions into the effort. A government report exposes massive delays, poor planning, ...

A resident in Baofeng county, Henan province, charges his new energy vehicle, on Nov 26, 2021. [Photo/Xinhua] China's charging infrastructure for electric vehicles, or EVs, nearly doubled in 2022, buoyed by the ...

Technicians conduct maintenance work on electric vehicle charging piles outside a hotel in Cixi, Zhejiang province. [Photo/Xinhua] China's development of charging infrastructure is on the fast track, supported by a ...

Palikir electric vehicle charging infrastructure
