

Panama emtec energy

What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

What is Panama doing in a low-carbon economy?

Tell us and we will take a look. The government of Panama is prioritising energy security and the diversification of the energy mix in its transition to a low-carbon economy, with a focus on promoting renewables, efficiency and electro mobility.

Is Panama phasing out diesel power plants?

Panama has committed to phasing out power plants that burn diesel or other heavy fuels by the end of 2023, with the decommissioned capacity to be replaced by the 670 MW Gatun power station, a natural gas plant scheduled to begin operations in 2024.

Does Panama produce oil or natural gas?

Panama does not produce crude oil or natural gas. Panama consumes 1.61 gallons of oil per capita daily (as of 2016), or 14 barrels per capita annually. The United States is a key supplier of fuel oil to Panama, along with Ecuador, Peru, and Mexico.
