The energy crisis, in association with rapid population growth in the state, the cancellation of several proposed coal-fired power plants in the region, and several transmission issues, put pressure on Reno and Nevada to find new sources of electric power. The state, and especially the city of Reno, responded by significantly increasing solar capacity.

Solar energy is one of the fastest-growing sources of renewable energy in the United States, with the potential to provide clean, affordable, and reliable power to communities and businesses. However, developing and implementing large-scale solar projects can pose significant challenges, such as financing, permitting, zoning, and community engagement.

Ichma o Ichmay (otras variantes: Ychma, Ychsma) es el nombre de un se#241;or#237;o o entidad estatal de la #233;poca preincaica del Antiguo Per#250;. Floreci#243; en la costa central del Per#250;., en parte del actual departamento de Lima, entre los a#241;os 900 y 1470 de la era cristiana, en los periodos conocidos como el Horizonte Medio y el Intermedio Temprano.

The purpose of the Solar@Scale guidebook is to help local government practitioners--including planners, economic development professionals, local government managers, and elected and appointed officials--make decisions that improve large-scale solar development outcomes.
