

The Moroccan Agency for Sustainable Energy (Masen) and the Ministry of Energy Transition and Sustainable Development have allocated 333 MW of PV capacity in a 400 MW tender launched in January 2020.

The lifetime of a photovoltaic system is at least 25 years. It depends on the correct choice of components whether this time will be calm and safe. Poorly configured devices or low-quality materials can cause failures. This results in dissatisfaction on the part of the end customer and the need for service.

Rabat - In yet another sign of its continued efforts to combat climate change through the use of renewable energy, Morocco will install its first floating photovoltaic power plant in the coming ...

The world's attention is currently focused on the energy transition to sustainable energy. The drive to reduce greenhouse gas emissions in order to limit global warming, energy security, and the generalization of access to energy have contributed to the adoption of the Moroccan Energy Strategy, with a strong focus on renewable energy (RE). ...
