

What is the energy transition in Poland?

Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly. In the latest, seventh edition of the "Energy Transition in Poland" report, Forum Energii presents the state of transition play and a broader look at the overall process.

Why is energy production increasing in Poland?

At the same time, energy production from natural gas increased, by more than 40%. This is a result of falling fuel prices and the flexibility of gas generation. Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly.

How much energy will Poland generate by 2035?

Renewable energy sources are forecast to account for 70% of the total electricity generation capacity in Poland by 2035, compared with 46% in 2023, according to GlobalData's power capacity and generation database.

Does Poland have a helmsman for the energy transition?

The energy transition in Poland has no helmsman. There is no single centre to manage the process, so the changes taking place are chaotic. Poland has never offered a comprehensive vision for the decarbonisation of the economy or a plan to reduce dependence on energy resources imported from abroad.

Are there thermal power plants in Poland?

Thermal power plants and combined heat-and-power plants in Poland (database) Exemplary takeaways based on the database. Use arrows to navigate between slides. Plenty of aged coal capacity in the south, increasingly many gas CHPs in the rest of the country. Map of thermal power in Poland

How much money does Poland spend on energy?

Last year alone, Poland spent PLN 138 billion (i.e., slightly less than on defence). Over the past decade, taking inflation into account, the cost of fuel imports has already exceeded PLN 1.2 trillion. Energy driver needed right away The energy transition in Poland has no helmsman.
