

Wood Mackenzie research finds the result to be downgrades in the amount of capacity actually available to the market when it is most needed. PJM's recent capacity market auction is a perfect example of how these accreditation rules are impacting markets: capacity prices were nearly 10 times higher than the previous auction.

Wood Mackenzie's Q3 2024 Global Wind Power Market Outlook Update presents an analysis of global and regional wind power installation forecasts through 2033. The update includes a detailed market forecast update for all countries for wind power from 2024 to 2033. The forecast data includes a split of expected onshore and offshore development ...
