Why do we need batteries in Portugal?

"Batteries also add to the competitiveness of our renewable energy portfolio by making solar and wind power available when they are most needed." Large-scale energy storage projects in Portugal have been relatively small in number, although 2022 saw the inauguration of a 40GWh pumped hydro energy storage (PHES) project by utility Iberdrola.

Will a 5 mW 20 MWh battery storage system be built in Portugal?

Galp, a Portuguese energy company, has announced plans to build a 5 MW/20 MWh battery storage system in Portugal, in collaboration with Powin. The system at one of Galp's solar plants will enable it to adjust its PV production profile and meet its energy requirements. This project marks Powin's first venture in Europe.

Is Europe ready for large-scale battery energy storage?

"Europe is expected to implement more than 90 GWh of large-scale battery energy storage projects by 2030, and we are well positioned to support this demand and keep up with the rapid growth of energy storage in the wider European region, Middle East and Africa," he stated.

How much solar power does Portugal have in 2022?

Portugal's cumulative PV capacity hit 2.59 GW at the end of 2022. It aims to install 20.4 GW of solar by 2030. The country has set a goal of at least 80% of electricity production coming from renewable sources by 2050. In November, it enjoyed a weekend of being powered solely by renewables.

Portugal is a leader particularly in wind generation and is driving the rapid deployment of photovoltaic solar energy and battery storage. In efforts to increase renewable energy, Portugal expects to launch its first offshore wind power auction by the last quarter of 2023. This project has goals of reaching 10 gigawatts capacity by 2030.
