Overview Tuvalu's carbon footprint Tuvalu Energy Sector Development Project (ESDP) Commitment under the Majuro Declaration 2013 Commitment under the United Nations Framework Convention on Climate Change (UNFCCC) 1994 Solar energy Wind energy Filmography Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location. It is somewhat complicated because Tuvalu consists of nine inhabited islands. The Tuvalu National Energy Policy (TNEP) was formulated in 2009, and the Energy Str...

A sole provider of electricity services to the rest of the Tuvalu. TEC has set a vision of "Powering Tuvalu with Renewable Resources" and this align well with the Tuvalu Government set target of 100% renewable energy by 2025. All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%.

By 2027, APS will seek to add more than 6,000 MW of solar and wind power, coupled with battery storage,

Power group aps Tuvalu

which will provide the greatest long-term value and affordability to customers. With this technology, APS can capture that clean renewable energy and store it for customers to use later, when the sun isn't shining and the wind isn't blowing.
