

Supervisory Control and Data Acquisition (SCADA) systems are integral to modern electrical substations and power grids, enabling real-time monitoring and control. This blog explores the significance of SCADA ...

What is a Smart Substation? A smart substation is a digitally controlled power substation that uses intelligent electronic devices (IEDs), high-speed communication networks, and advanced ...

Apraava Energy is on course to soon complete its interstate transmission system (ISTS) scheme housed under "Fatehgarh IV Transmission Ltd." According to latest information available from ...

Based on the analysis of the consequences of substation faults and the recovery strategies, this paper proposes a process for dividing the sequence of state transitions of the substation, ...

The company has faced criticism over its use of turbines, which campaigners claim have violated clean air regulations, but says the polluting machines will be used for backup power only once ...

Major power outage at Pune's Hinjewadi IT hub affects over 50,000 consumers Full restoration of power may take time even as restoration work is in full swing after a technical fault hit power ...

? What are EnerSys batteries used for? EnerSys batteries are designed for industrial, utility, telecom, and critical backup applications. They provide reliable energy storage for systems like ...

A malfunctioning or non-functioning protection mechanism is a leading cause of catastrophic generator failure in power systems. Among the most important and costly electrical equipment in the power plant are the main generator, step-up ...

A railway power substation in Russia's Volgograd Oblast burned after a night drone raid that caused explosions and a massive blaze near Zhutovo station. The strike cut electricity to rail lines, and forced flight restrictions across the area.

We tested and researched the best home battery and backup systems from brands like EcoFlow and Tesla to help you find the right fit to keep you safe during outages or reduce your reliance on grid ...

The Federal Government has unveiled plans to establish a \$18.2 billion super grid aimed at overhauling Nigeria's ageing and fragile power infrastructure. The Minister of Power, Chief ...

FGN Power Company in collaboration with Siemens Energy on Thursday successfully commissioned a 63MVA, 132/33kV mobile substation at the Eleyele transmission substation in Ibadan, Oyo state, marking a

Power substation backup

key step in the ...

FG announces plans to build \$18.2bn super grid Minister of Power, Chief Adebayo Adelabu, has announced plans of the Federal Government to build a super power grid for the country. He ...

The substation to the right further increases reliability by having an additional transmission line, an energized spare power transformer, primary ring-bus protection, motor-operated switches, and a secondary transfer bus.

EnerSys batteries are designed for industrial, utility, telecom, and critical backup applications. They provide reliable energy storage for systems like data centers, power plants, switchgear, ...

Notice Details and Documents: Description - Description: Delivery - external backup power supply - traction power supply rectifier and delivery - external backup power supply - 110V battery for ...

A Northland lines company says substation break-ins are endangering lives and causing power cuts affecting thousands of people. Top Energy chief executive Russell Shaw said he was shocked by what he described as the offenders" ...
