

Emily Cassidy, who studies climate solutions in the food system at the climate nonprofit Project Drawdown, says that shifting away from meat and dairy is an effective way to cut emissions quickly. She calls it an "emergency brake ...

Project Drawdown researchers ranked shifting a "plant-rich diet" as #4 of "the 100 most substantive, existing solutions to address climate change." Source: Project Drawdown, the most comprehensive plan ever proposed to ...

Project Drawdown is a leading resource for climate solutions, aiming to stop and reverse climate change quickly, safely, and equitably. The organization focuses on advancing science-based solutions, fostering bold ...

30. Project Drawdown, International "Drawdown" refers to the point at which greenhouse gas emissions start to decline. Project Drawdown is an open-source and expert-reviewed resource that policymakers, universities, ...

Food is central to our daily lives. While we often think about what we eat, we don't always consider what gets thrown away. In the United States, nearly one third of the food produced ...

By framing diet as a cultural battlefield, rather than a potential climate solution, sensationalist narratives distract from the attainable actions that most people are actually open to.
