Puerto Rico rural sun power

In Puerto Rico, coffee was a major industry before the 1940s. Arabica beans were introduced to the island in 1736. Production soared in the central mountainous area after 1855 because of cheap land, a low-paid and plentiful workforce, good credit facilities, and a growing market in the U.S., Spain, and Europe.

Rural communities in Puerto Rico are banding together to host solar-powered microgrid systems for emergencies like Hurricane Fiona and for day-to-day use. Electricity prices have increased to 33 cents per kWh in 2022--almost double the 2020 rate--due to global increases in the cost of natural gas, which needs to be imported to the island.
