Hi RAK Staff, Meshtastic user here. Been using your WisBlock kits since they were first supported. So much better than other manufacturers. I've also used all the enclosures at some point in time. I have a few of the 100mm Unify enclosures and they are doing ok, just take a few days to come back up to full power after a few days of rain or clouds. They are just a little ...

RAK Wireless Solar Unify Enclosure IP67 150x100x45mm. While not a 100% turn-key solution, this one is much easier to put together if you're not wanting to do one of our full solar builds. This build requires a WisBlock, Battery, Antenna, and cable. All of which are linked below.

For whatever reason, I've only had this issue with RAK boards and 18650s. Was using 18650 protected button top cells. I haven't been able to determine why it happened, but flat lipo cells seem to have been working fine with my RAK boards prior to the switch.

I have a RAK WisBlock Meshtastic starter kit with the unity solar enclosure. The problem I have is that when it gets dark the device stops broadcasting although I can still connect via Bluetooth. It's as though it's going into standby when the solar panel stops generating electricity even though the battery is at 90%.

Those are for holding the enclosure to the solar panel. In early iterations I made a design change that made it impossible to get a wrench under the enclosure to hold the nuts. The carriages slide under the lip of the panel, underneath each hole. Then you can screw down the enclosure without needing a wrench to hold the nuts.
