Lead Acid Batteries. Lead acid batteries were once the go-to choice for solar storage (and still are for many other applications) simply because the technology has been around since before the American Civil War.However, this battery type falls short of lithium-ion and LFP in almost every way, and few (if any) residential solar batteries are made with this chemistry.

A General overview of Thailand's Solar Market. Thailand, a member of the Association of South Asian nations, has gone through an extended political instability period. ... a lithium-ion battery (commonly referred
