Sierra Leone is endowed with potential diverse energy sources, e.g., solar, wind and hydro, but still has one of the lowest electricity access rates in the world. According to Sustainable Energy for ALL (SEforALL)2021, the national electrification rate is approximately 26 percent with approximately 6 percent accounting for access in rural areas.

Publication date: 24 June 2024 Authors: Khan, Safa Koo, Bryan Bonsuk. Description: The survey shows that nationwide 21.1% of Sierra Leone households have access to electricity via the national grid (20.5%) or mini-grids (0.6%) and 14.7% have off-grid access. Off-grid sources predominantly include solar products such as solar lanterns, solar home systems, and solar ...
