It includes a focus on renewable energy sourcing. We believe that any renewable energy sourcing roadmap should begin with a dual assessment - internal and external. The former aims at building an understanding of clients' global energy consumption and trends (by region, by usage), and how they manage energy procurement.

Experts, expertise, experience - this is what differentiates our consulting services in the marketplace. Stemming from a broad background in Hitachi Energy and power quality consulting, we have expanded to offer services that enhance the energy transition, including renewable power plant design, e-mobility solutions design, techno-economic analysis of emerging tech ...

Renewable and low-carbon energy sources are essential for sustainability--and they create opportunities. For both established and emerging players in the energy industry, a low-carbon future opens the door to new businesses in areas like solar, wind, hydrogen, and carbon capture. But maximizing returns often means understanding--and developing--a host of new ...
