

UK solar and storage developer Elements Green has attracted EUR 80 million (USD 93.5m) from a fund managed by Copenhagen Infrastructure Partners (CIP) to support project development, ...

Copenhagen Energy and Copenhagen Infrastructure Partners (CIP) have formed a 60:40 joint venture to develop a 100 MW ground-mounted solar PV array alongside a 50 MWh lithium-ion ...

This obligation shall be treated as fulfilled only when at least 85% of the total energy stored is procured from Renewable Energy sources on an annual basis. There are several energy storage technologies available, broadly - ...

Binding offers are understood to be landing around now for Edify Energy and two names that feature as being in the final mix are Canadian pension fund CDPQ and Copenhagen Infrastructure Partners.

Energy islands could also act as sites for electricity storage or for producing renewable hydrogen. The Belgian "Princess Elisabeth Island" in the North Sea will bundle up to 3.5 GW of offshore ...

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power. This project is scheduled for grid readiness ...

With rising sea levels, extreme heatwaves, and water scarcity pushing our cities internationally to the brink, our world demands urgent solutions for a more sustainable urban future. This article ...

Pumped-storage hydropower stands at the forefront of modern energy storage technologies, offering a proven solution to Europe's growing renewable energy integration challenges. By leveraging gravity and water's potential energy, ...

Heating, ventilation, and air-conditioning (HVAC) systems account for the largest share of energy consumption in European Union (EU) buildings, representing approximately 40% of the final ...

Copenhagen Energy and CIP Partner on 100 MW Solar + 50 MWh Storage Project in Denmark Copenhagen Energy and Copenhagen Infrastructure Partners (CIP) have formed a 60:40 joint ...

Danish renewables developer Eurowind Energy A/S has received the green light for the construction of a 51.3-MW hybrid energy park incorporating wind and solar photovoltaic (PV) ...

As Denmark aims to reach 1 million EVs by 2030, their batteries, each capable of powering a home for up to 5 days, present a unique opportunity. At Gridlinx, we have developed a novel ...
