

Reon battery Montserrat

What is Reon battery technology?

Backed by multiple patent-pending technologies, REON enables the efficient aggregation and application of heterogeneous battery cells. REON's technology can systematically unleash full battery capacities to achieve up to 2-4X performance comparing to conventional battery system design.

What is Montserrat's energy policy?

The first Energy Policy was approved in 2008 by the Government of Montserrat. The policy was then revised and updated in 2016 to include Government incentives and to update the policy with appropriate targets. The new Energy Policy (The Power to Change) that is currently being implemented runs from 2016 to 2030. Progress made so far includes: -

Who installed the solar PV system in Montserrat?

The solar PV system was successfully installed and commissioned by the Salt Energy Company and handed over to the Government of Montserrat in March of 2019. The units were installed on three buildings; MCW workshop, the Brades power Station and the Factory Shell Buildings commonly referred to as the Montobacco building.

Why should Montserrat buy a new electric vehicle?

The purchase of the vehicle supports the Government's aim to promote the development of electric, hybrid electric and advance vehicle technologies for Montserrat. A pilot project was commissioned to review the performance of the technology under local conditions and get feedback of driver's acceptability.

What makes Reon unique?

Following extensive research & development, REON's team has developed unprecedented methods of managing and controlling batteries. Backed by multiple patent-pending technologies, REON enables the efficient aggregation and application of heterogeneous battery cells.
