Our mission is to make renewable energy accessible and affordable, contributing to a sustainable ...

An off-grid solar system, also known as a stand-alone solar system, is a self-sufficient energy generation setup that operates independently of the main power grid. Unlike grid-tied systems, which are connected to the utility grid and often feed excess energy back into it, off-grid systems are designed to meet the energy needs of a specific location without relying on external sources.

After the installation, RK solar arranged for our energy provider to install a smart meter. The person who installed the meter seemed to have made a cut in one of the wiring. The RK solar electrician who initially installed the solar system came out and fixed the issue (went above and beyond and was gracious about it).
