

Russia solar power

Solar energy continues to shine as one of the fastest-growing sources of electricity worldwide, with many countries seeing double-digit annual growth in solar installations. This graphic ...

This report will highlight the top 40 countries at the forefront of solar energy adoption, showcasing their efforts to combat climate change. Notably, China is currently leading the way in solar ...

The floating solar power plant helps to save land, reduces water evaporation and can be used in conjunction with hydroelectric power plants. The station is operating normally and has become ...

The gas market report confirms that further progress was achieved in the diversification of EU gas supply away from Russia and the structural change in imports. The end to Russian pipeline ...

ARVE presents the results of its next report - "Status and prospects for the development of the photovoltaic industry in Russia and the world", which reflects the trends in ...

A Russian drone equipped with solar panels has been spotted in territory controlled by Ukrainian forces, according to photos circulating on social media. A Russian drone with a solar panel ...

China's LNG imports have declined for eight consecutive months, down 12% y/y in June 2025, due to increased domestic gas production. Trade tensions with the U.S. and a 125% tariff have ...

According to the latest Ember Yearly Electricity Data monitoring (May 2025), Russia has increased its solar electric energy production more than 18 times over the past 10 years - from ...

BRICS countries now generate more than half of the world's solar power In 2024, the ten BRICS members -- Brazil, China, India, South Africa, Russia, Egypt, Ethiopia, Indonesia, Iran and the ...

The Russian solar-powered drone, though imperfect, signals a shift toward energy-efficient, long-endurance drones. As solar cell efficiency improves and designs are refined, such drones ...

A recent U.S. policy shift endangers \$373 billion in clean energy investments, with new tax rules potentially reducing eligible projects. Concerns arise as manufacturers pause solar and wind ...
