Introduction. All lithium-ion batteries applied in various segments are being produced by world's best manufacturing and technology. We present all kinds of optimized solutions to meet customer's needs and offer differentiated values to our users with higher performance, longer life and more reliable safety.

High Voltage (HV) lithium-iron modules are cobalt-free, extremely safe and high-performing, and a very cost-effective HV battery to build and deliver flexible systems and scalable solutions. 76.8V HV Series use "best-in-class" Lithium Iron Phosphate (LFP) chemistry for the highest level of safety, thermal stability, and reliability.

Recently, Sacred Sun has successfully won the bid for China Tower's 2020 intensified e-commerce procurement project for lithium iron phosphate battery packs for backup power. This bid will further expand the deepening application of Sacred Sun Lithium Batteries in the field of communication backup.

the world heads into renewable energy, lithium-ion batteries have taken center stage in the storage of solar energy.

High Voltage Lithium battery system, which integrated top-grade high discharge rate lithium-iron-phosphate (LiFePO₄) with build-in smart BMS with monitor and protection function! Designed with an LCD screen shows the main parameters and other monitor parts together, it's convenient for checking detailed data during use.

2 ???· The Sacred Sun battery will minimize electronic waste by having a long life span and recyclable parts. The lithium-ion chemistry that the Sacred Sun battery uses also produces fewer toxic fumes than other lead-acid batteries, positioning it as a restively greener alternative for end. Some Applications of Sacred Sun 51V 100Ah Lithium-Ion Battery

HV Enerstack Battery is a lithium iron phosphate (LFP) battery pack with 5.12kWh increments and wireless connection. A single HV Enerstack contains between 2 to 6 battery modules stacked in series and can reach up to 614.4V in one stack. With a continuous

Introduction. DCS series deep cycle battery, with special high-tin corrosion-resistant alloy and optimized positive grid structure design, and special negative active material formula, improve the charge acceptance ability, reduce the negative plate sulphation, more suitable for the partial state of charge (PSOC) application, it can be widely used in household energy storage system.
