How much oil does Saudi Arabia use for power generation?

Saudi Arabia burns more crude oil for power generation than any other country. In 2015, its average use of oil in power generation peaked at 0.9 MMb/d. In 2018, it reported its lowest average of crude oil used for power generation since 2009 at 0.4 MMb/d, 41% lower than in 2015 (EIA 2020).

How much energy does Saudi Arabia use?

Saudi Arabia is a major consumer of energy, with rapidly growing domestic demand. Total electricity consumption in 2018 was around 289.8 TWh, a slight increase of around 0.42% from the 2017 level of around 288.6 TWh.

Which is Saudi Arabia's second-biggest oil field?

The Khurais field is Saudi Arabia's second-biggest oil field, after Ghawar. It is located 250 km southwest of Dhahran. The oil field started production in 2009 and has a capacity of around 1.5 MMb/d. The Khurais complex, which comprises the Abu Jifan and Mazalij fields, is around 106 km long and 18 km across at its widest point.

Why is Saudi Arabia a major oil producer?

Arabia is one of the world's leading oil producers and exporters. It has the second-largest proven crude oil reserves after Venezuela. Saudi Arabia's oil reserves have made it one of the most significant players in the global oil market.

Is Saudi Arabia a good country for solar energy?

Saudi Arabia is currently ranked sixth for solar energy potential worldwide, and thirteenth for wind potential. Figure 10. Average wind speed at 100 meters (meters per second). Source: KAPSARC; Author's calculations based on data from KACARE (2016). Figure 11. Average global horizontal irradiance (GHI) (Watt-hours per meter squared [Wh/m<sup>2</sup>]).

How does Saudi Arabia generate electricity?

Saudi Arabia also uses its desalination plants to generate electricity by using the steam emitted from the desalination process. In 2018, its electricity peak load reached more than 61,000 megawatts (MW), and its power generation capacity around 53,500 MW. Figure 16. Saudi Arabia's electricity generation (2018). Sources: BP (2019); KAPSARC.

AL KHOBAR, December 12, 2024 - Subsea 7 has been awarded a contract worth up to USD 300 million for works offshore Saudi Arabia as part of a long-term agreement, the company said on Thursday. The contract was designated as "substantial," which Subsea7 defines as being valued at USD 150 million-300 million.
