

# Saudi Arabia prosumer energy

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

What is Saudi Arabia's energy strategy?

The kingdom aims to increase its electricity generation capacity from 83 gigawatts (GW) in 2023 to 110 GW by 2028, supported by a \$293 billion investment in both conventional power and renewable energy projects. At the heart of this strategy is Saudi Arabia's goal to generate 50% of its electricity from renewable sources by 2030.

How much electricity does Saudi Arabia generate?

Electricity generation is 40% from Oil 52% from Natural Gas and 8% from steam. Generation capacity is approximately 55 GW. A looming energy shortage requires Saudi Arabia to increase its capacity. Capacity is planned to be increased to 120 GW by 2032.

How many solar power plants are there in Saudi Arabia 2024?

In June 2024, Saudi Arabia launched NREP's Geographic Survey Project for Renewable Energy. The survey will install 1,200 solar and wind energy measuring stations across more than 328,000 square miles to identify potential development sites for renewable energy projects. 28 Table 6. Major operating power plants in Saudi Arabia, 2024 Table 7.

Why is Saudi Arabia enhancing its electrical power sector infrastructure?

Saudi Arabia is enhancing its electrical power sector infrastructure to accommodate the rising demand from both the residential and commercial sectors, simultaneously advancing its strategy for energy diversification away from traditional oil and gas reliance.

Does Saudi Arabia need a natural gas power plant?

Saudi Arabia seeks to increase its electricity generation capacity from natural gas and renewable energy sources as part of the country's Vision 2030.3 The Saudi Power Procurement Company (SPPC) awarded bids for four natural gas-fired power plant projects in October 2023 and began receiving bids for four additional projects in January 2024.

RIYADH: Saudi Arabia and the Philippines have signed their first agreement on energy cooperation, marking a milestone in their bilateral relations and supporting the Kingdom's sustainability drive.

Saudi Arabia's energy system must undergo a significant transformation to meet its net-zero target by 2060,
