Does Senec sell batteries in Australia?

UPDATE: Senec no longer sell batteries in the Australian market and have chosen to focus on the European markets. According to their website they will still honour warranties for any Australian customer who purchased a SENEK battery. SENEK was formed in Germany in 2009 with a focus on battery energy storage.

Do Senec batteries have warranties?

According to their website they will still honour warranties for any Australian customer who purchased a SENEK battery. SENEK was formed in Germany in 2009 with a focus on battery energy storage. They furthered development in this field from 2011 for use in PV solar systems, wind power and commercial use.

Is Senec a good energy storage system?

With a maximum battery efficiency of 98% and a depth of discharge of 90%, you'll get a lot out of this energy storage system for your needs. SENEK claims on their website that it's compatible with all systems regardless of the manufacturer. The advantage of their battery is that it can be retrofitted to an existing solar PV system.

Does Senec have a stand-by mode?

German battery provider Senec announced this week its residential storage systems were automatically switched to a regulated stand-by mode. The remote shutdown relates to three products from the company: the Senec.Home V3 hybrid; Senec.Home V3 hybrid duo; and Senec.Home V2.1.

Is the Senec home V3 hybrid compatible with all solar systems?

The SENEK Home V3 Hybrid is compatible with all solar system brands. This is especially useful if you're retrofitting the hybrid battery to an existing solar PV system. Thus it saves you time and stress that's associated with adding battery storage later down the line.

Why is Senec shutting down in Germany?

The German battery manufacturer said this week its residential storage systems were automatically switched to a regulated stand-by mode in Germany. The background to the remote shutdown is three reports of explosions in houses in which Senec products were installed. After the firefighters brought the battery outside the building, it ignited again.

Like a traditional solar battery, the SENEK hybrid battery uses the energy generated during the day to charge the battery and any battery power can be used when the sun disappears. Of course, any excess power generated is pumped back into the grid for rebates. This system allows households to reduce power bills by up to 90 per cent.

As a Tibber customer, I am paying the stock market price based on my hourly consumption. Additionally, I own a 12 kWh Senec storage/battery "system", that will be charged by default via my PV. But I can also load
