Hi everyone. I would greatly appreciate your help. Yesterday, I downloaded Battery Monitor windows software ver 2.1.9 from the Seplos website in order to enable Bluetooth function, which I did via the software. I have also enabled couple of other functions in the software, the 2 immediately...

The Seplos BMS can be configured when to do the balancing. The active balancers usually are not "smart" and support no configuration. You need to find an active balancer that will balance only under appropriate conditions. I.e. activate the balancing only under specific conditions. Let's say over 3.45V.

Good news, thank you. That's interesting, having a mix of canbus and rs485 version depending of who is the master, the battery bank could be use with voltronic or deye inverter !! I need to ask seplos if this configuration is supported. I'm tempted to say yes since the battery inter comms...

It would be very difficult for the Seplos balancer to cause any trouble IMHO. Mostly because it is quite manual: you must press the power button to enable the balancer board. It sits in standby mode for up to 10 hours. If it does not receive a signal from the BMS to begin balancing in that time frame, it shuts itself off.

Using the tool of choice open the directory (folder) for your HA configuration (where you find configuration.yaml).; If you do not have a custom_components directory (folder) there, you need to create it.; In the custom_components directory (folder) create a new folder called bms_ble.; Download all the files from the custom_components/bms_ble/ directory (folder) in this repository.

Allerdings gehe ich davon aus, dass es an den BMS Einstellungen meines Seplos BMS V2 liegt. Die gleiche Anlagenkonstellation (Deye Sun 12K, 2 PV Strings und Seplos BMS verbunden über CAN) bei meinem Nachbarn mit Seplos BMS V1 zeigt dieses Verhalten eben nicht. Da wird der Ladestrom noch vor dem Erreichen der 100% heruntergenommen.

You do need to unplug SA when you go into BMS configuration mode, but you have to disconnect the other BMS comms wires anyway to do that. ** SA does have some "quirks" with Seplos BMS cell voltages (hence wanting to run the PC app as well), but several people have reported to SA. Hopefully a fix will occur "soon";.
