Is Singapore developing a digital twin & distributed energy resource management system?

There has been good progress in the development of Singapore's first Grid Digital Twin and Distributed Energy Resource Management System, and they will continue to be developed over the next few years.

Will Singapore's Energy Grid be future-proofed?

As part of Singapore's energy transition, the Energy Market Authority (EMA), together with industry partners, have embarked on digital projects to future-proof the nation's energy grid infrastructure.

Why should Singapore invest in a grid digital twin?

Through these initiatives, Singapore will have smarter and more efficient ways of monitoring and predicting the health of the nation's grid assets and network. In addition, the Grid Digital Twin allows for a risk-free environment to study and test different scenarios.

What is the Singapore Integrated Transport & Energy model (Sitem)?

EMA and agencies such as A\*STAR's IHPC, S&TPPO, and TUMCREATE, have developed the Singapore Integrated Transport and Energy Model (SITEM) to model the impact of additional Electric Vehicle (EV) demand on the grid and identify necessary infrastructure upgrades under different scenarios.
