

Singapore star power solutions

Will Singapore's Energy Grid be future-proofed?

As part of Singapore's energy transition, the Energy Market Authority (EMA), together with industry partners, have embarked on digital projects to future-proof the nation's energy grid infrastructure.

Is Singapore developing a digital twin & distributed energy resource management system?

There has been good progress in the development of Singapore's first Grid Digital Twin and Distributed Energy Resource Management System, and they will continue to be developed over the next few years.

How can a*star improve Singapore's long-term decarbonisation pathways?

A*STAR has also incorporated high-resolution electricity demand results obtained from the Digital Network Twin into a national-level energy systems model that aims to optimise Singapore's long-term decarbonisation pathways.

Electrical Power is the critical element that brings devices and equipment to life. As a result, power distribution today has to be much more than just reliable. It should be efficient to plan, easy & safe to install and should have the flexibility & adaptability for future changes for energy management and for individual needs.
