Much like the amount of solar PV, rated horsepower (HP) of pumps can be misleading. For a solar pump, if HP is stated, this usually refers to the maximum solar panel which can be used with the system. If the pump is inefficient and simply using more energy, it doesn't always mean you'll get more flow. Always check both HP and stated flowrates.

Our solar water pump range - SF2 (left) for two acres and SE1 (right) for one acre. We are experts in the manufacturing of solar water pumps, with over 10,000 solar pumps sold in more than 20 countries - and counting!
