What is solarassistant & how does it work?

Take advantage of the most powerful, low cost and globally available device on the planet: the Raspberry Pi. Metrics are live up to 2 seconds. SolarAssistant is a standalone system that can be used without the internet. However when you are away from home all features are available remotely via the internet.

What is Namibia's green energy future?

The home of those who unlock Namibia's Green Energy Future. A country with an abundance of renewable energy sources, yet still over-reliant on energy imports. This opportunity points to a potential future which is filled with various decentralized renewable energy solutions powering Namibia's development and growth.

Is solar assistant better than home assistant?

Yep ease of setup, solar assistant is all in one and does that specific thing well whereas home assistant is all over the place with its integrations. Dashboard values do not update in sync It can only update based on the data it receives. First look at the source data before assuming SA itself is at fault.

Where can I find electrocentre in Namibia?

Onethidi Main Road, Ondangwa, Namibia. Email: electrocentre@iway.na Cell: 0816638839. P.O Box 90433, Windhoek, Namibia. Erf 21 Nachtigal Street, Ausspannplatz, Windhoek.

Is solar assistant logging data or archiving data?

I have seen no information to indicate whether Solar Assistant is "logging" data or "archiving" data. High end "historian" products do not actually write every single data point to disk. In summary, for each data point type (such as watts or frequency or voltage) you set a sample frequency and a resolution.

The main dashboard displays a real-time view of the most important metrics including any possible alerts or inverter faults that might be in effect. Below is an example dashboard of a Voltronic/Axpert/MPP Solar inverter. The battery ...

Note our system will ensure your previous device has been offline for at least 7 days before allowing a transfer. This is to prevent solar installers from transferring licenses of previous installations to new clients.

The most reliable USB cable to connect Voltronic inverters to SolarAssistant via the RS232 port. The RS232

Solar assistant via Namibia

port provides better isolation between monitoring device and inverter as the inverter micro USB port outputs 5.1V USB power which isn't ideal when it feeds into your monitoring device USB bus.. RS232 is more resilient against electronic signal disturbance (noise) ...

Solar Assistant is a solar system monitoring and remote control app. It can also be used for home automation and load control. I am using this poll to measure it's popularity on the forum. I have never used it before, but am curious how many people are using it.

Device access Overview. SolarAssistant can be accessed via web browser, Android or iPhone app. The application is: Standalone: an internet connection is not required. You can access SolarAssistant directly via LAN on it's IP address similar to ...

1) Update time, 5 Minutes vs 2-5 seconds with Solar Assistant. 2) Cloud Storage of data with PV-Pro vs SD card Data storage with Solar Assistant. In terms of Sol-Ark usage IMHO PV-Pro web portal is way better than Solar Assistant. The only question is can you live with the 5 minute update interval.

Home Assistant. Setup Broker setup Energy dashboard Adjusting solar settings. Integration. MQTT API Node-RED. Software updates. Overview Changelog Beta program. Example installations. The Orange PI 3 LTS is a powerful board fast enough to provide a responsive interactive experience when performing real-time monitoring of multiple solar devices. 1.8Ghz Quad-core 64-bit processor; 2GB SDRAM; 8GB eMMC onboard storage; 2.4Ghz and 5.0Ghz WiFi; 1Gbps Ethernet; 3x USB ports; HDMI output

Why have Solar Assistant in the middle if the data can be sent straight to Home Assistant with a much more customizable experience? My best guess is the ease of setup, support for many inverters / BMS, and remote inverter configuration. \$80 is easily worth it if I am saving many hours of reading and configuring.

An example URL is xxxx .solar-assistant.io. In this guide we are going to use Chrome, but it should be very similar with other browsers. Step 2. Select "Install app" or "Add to home screen" from the browser context menu. Step 3. Select "Install". The application is now installed on your mobile. Open it from the app drawer like any other ...
