

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

The Clean Energy Frontier is a series of deeply reported stories from reporters around the world shining a light on the supply chains which produce clean energy technologies, such as batteries, EVs, solar panels and wind ...

However, as ferrochrome production is highly energy-intensive, the company faces significant challenges due to Zimbabwe's electricity shortages. Ferrochrome producers in the country consume up to 300MW of power, and ...

On June 26, SANY Silicon Energy officially commenced construction of a 10MW solar power plant in Zimbabwe. The project, undertaken by Runtu Mining Company, marks SANY's first solar ...

SANY Silicon Energy, a division of construction machinery company SANY Group, has officially started the construction of a solar power plant in Zimbabwe. This project, commissioned by ...

In Zimbabwe, UNHCR is enhancing its environmental sustainability in partnership with UNDP by installing a 40 kilowatts solar energy system to power its Zimbabwe office. The solar energy system significantly reduces its reliance on ...

ZIMBABWE'S solar energy sector continues to register notable growth as more independent power producers (IPPs) join the drive to boost clean energy generation and reduce electricity ...

Africazine: Afreximbank Takes Bold Steps Towards Solar Power Initiative in Zimbabwe By Sully Manope, Southern African Correspondent, Windhoek In a transformative move for renewable ...

President Emmerson Dambudzo Mnangagwa is today officially commissioning the first phase of Zimplats' 35MW solar power project in Selous, a landmark development that is being celebrated as one of Zimbabwe's most significant ...

This project aims to set the stage for an impressive 1,000 megawatt (1GW) hybrid floating solar photovoltaic power system on the majestic Lake Kariba, Zimbabwe--a key location that holds ...

Energy and Critical Minerals: Africa is important for India's energy security and green transition. Indian companies are exploring lithium and other critical minerals in Zimbabwe, Namibia, and ...

The continent's greentech transition presents a strategic opportunity to address some of these barriers. For example, the development of solar plants and wind farms can mitigate energy supply constraints, thereby supporting downstream ...

The food processing industry plays a critical role in global sustainability challenges due to its environmental, economic, and social impacts. As food companies expand to meet increasing ...

The chapter mainly introduces the development background and international development status of SSP. Energy crisis and global climate change are major issues that affect global sustainable ...

Africa stands at the intersection of some of the most profound challenges and opportunities of climate change, security, and development. Despite contributing minimally to global emissions, ...

New York, July 2 - A new study published today shows that coupling renewable energy targets with supportive development policies and investments would have major financial benefits. ...

The global charge controller system market is experiencing robust growth, driven by the increasing adoption of renewable energy sources, particularly solar power. The market's expansion is fueled by the need for efficient energy management ...

Sany Silicon Energy has officially begun construction of its first photovoltaic (PV) power plant project in Zimbabwe, marking a major milestone in the country's push for sustainable energy ...

With Zimbabwe facing frequent power cuts and rising electricity costs, more people are switching to solar energy for cleaner, more reliable power. But to truly make the most of solar panels, ...

A new solar mini-grid at AU, just outside Zimbabwe's third-largest city of Mutare, is changing the lives of students like Lumboa. The 250 kilowatt solar power plant, officially commissioned on 6 ...
