Solar generators these days use lithium-ion batteries. There are two types: Li-ion NMC and LiFePO4 or lithium iron phosphate. Li-ion NMC batteries are lighter and cheaper. So solar generators using these types of batteries have easier portability. They are great for camping and outdoors. LiFePO4 batteries are heavier but they last much longer.

A solar generator works by collecting energy from the sun via solar panels, storing the energy in its built-in battery (lithium battery), and converting the energy into AC power through an inverter before being used in household appliances and other electronic devices.
