While solar charge controllers and inverters serve different purposes, they work together to ensure the smooth operation of a solar energy system. In an off-grid setup with battery backup, the solar charge controller regulates the charging of the batteries while the inverter converts the stored DC electricity into AC electricity for household use.

The first field solar PV plant in the Faroe Islands has been inaugurated. It is located on an abandoned football field in the village of Sumba, the southern most village on the southern most island of Suðuroy. The 250 ...

Solar power inverters are electrical components that convert DC power from your solar panels into usable AC power for your home. A newer type of solar power inverter is the hybrid inverter. It functions differently than a standard solar power inverter. It has the advantage of sending energy back to the grid.
