Lower fuel costs for pumping water . Before Oxfam installed the solar-powered pump at the well two kilometers from Gol"Anod, the time and burden of carrying water into town was only part of the problem: Pumping the water with a diesel generator made water expensive, says Hassan Mohamed Adan, 27, the Head of the Water Bureau in Ararso, the district in the ...

Ethiopia is the fourth country to join Scaling Solar. Ethiopia Electric Power signed an agreement with IFC to advise on developing up to 500MW of solar power under the initiative. Although Ethiopia has vast renewable energy potential, it currently has an energy shortfall of 500MW, with over 70% of its energy coming from hydropower.

Solar water pump definition A solar water pump is a mechanical pump powered by electricity generated using photovoltaic panels. It is popularly referred to as a solar water pumping system because it requires several key components to work. The critical constituents of a functional water pump include; A solar panel array A mechanical DC water pump Photovoltaic cables A fuse ...
